## Ecobag Network Sp. z o.o.

We are the largest producer of eco-friendly, paper bags with custom prints in Poland. Since 2004, we have continuously expanded the scale of our operations. Thanks to our focus on ecology, customer needs, and a modern machinery park, we are the fastest-growing manufacturer in the industry.

In 2023, our monthly production capacity exceeded 20 million bags. We manufacture Paper Bags with twisted and flat handles, using both brown and white paper. Our Paper Bags are known for their high quality, durability, and the best price.

We specialize in designing and producing paper bags with custom prints. We have our own DTP graphic studio and flexographic ink mixing facility. For large quantities, we print directly on printers that are part of the bag-making line. For medium-sized orders, printing is done using roll printers before the product is assembled. For orders below 5,000 pcs, we print on finished bags. We maintain large stocks of finished products.

We have many years of experience serving both Polish and foreign companies. Our own office and production staff, machinery, production halls, and high-storage warehouses enable flexibility and the maintenance of high-quality products. We serve corporations, giants in the clothing and footwear industries, wholesalers, medium and small businesses, as well as government institutions. The high quality of our work is demonstrated by long-term cooperation with regular clients and the certificates we hold for quality and environmental protection.

### Our Mission

Supply eco-friendly paper bags and envelopes to a largest group of Customers and to displace non-ecological substitutes from market, to save the natural environment for the next generations. The foundations of Customer relations are: understanding of needs, professional advice, flexible service and building long-term business relationship.

### Our Vision

Achieve the position of largest European producer of ecological bags, with customer print or without printing. To remove the harmful plastic bags from our life and from next generations.
